Meys, Jan Andries, Waterman, Hein Israel, and Krevelen, Dirk Willem van.
MODIFICATIONS IN THE REFRACTIVE INDEX AND DENSITY OF HYDROCARBONS DURING HYDROGENATION AND ISOMERIZATION (Aenderung des Brechungsindex und der Dichte von Kohlenwasserstoffen beim Hydrieren und Isomerisieren). [1960] [10]p. 19 refs.
Order from SLA mi\$1.80, ph\$1.80 61-10481

Trans. of Erdöl und Kohle (West Germany) 1957, v. 10, no. 7, p. 428-429.

Refractive indexes and densities change when olefins and aromatics are hydrogenated or when saturated hydrocarbons are isomerized, the change in refractive index divided by the change in density being 0.85-1.00 for hydrogenation and ~0.45 for isomerization. As shown for a Borneo crude, an anthracene oil, and a pitch, saturation and isomerization occurring during hydrogenation of aromatics can be determined from a refractive index vs. density curve plotted during the process.
